Daniel, the problem is that we don't have 200 years to change the environmental mindset.

09:45:25 From Rob Wheeler To Everyone:

Friends, Earlier in the year I submitted a number of recommendations to the Secretary-General's High-Level Advisory Board on Effective Multilateralism on Strengthening Our National and International Systems of Environmental Governance and Law. These recommendations came largely from my and our participation in the UNEP and Stockholm+50 processes and this webinar series.

It primarily focuses on civil society's call for the development and implementation of a Global Framework for Strengthening National and International Environmental Legislation and Law AND the call from Secretary-General Guterres in the Our Common Agenda report to re-purpose the Trusteeship Council and Hall to address and manage the Global Commons and to ensure the well-being and continued provision of our most valuable and essential Global Public Goods.

09:45:31 From Rob Wheeler To Everyone:

Continued: I believe that these recommendations would provide an excellent means for helping to achieve the Seven legacy themes that Stakeholder Forum has identified through this webinar series; but more particularly those focusing on Strengthening Environmental Governance

and Law; Human Rights and Environmental Justice; Connecting the Dots; and civil society's role in addressing environmental governance. As such I hope that many of the recommendations that I or we have made will be included in the People's Environment Narrative Report. I have sent my Submission to Stakeholder Forum for its consideration this morning and I would be happy to send it to any or all of you. RobWheeler22@gmail.com

Thank you for your considerations,

Rob Wheeler

09:46:26 From André F. Pilon To Everyone:

To restore the broken bonds between governance, politics, economics, culture, the environment and ethics it is essential a critical analysis of the role of contemporary paradigms of growth, power, wealth, work and freedom embedded into the political, technological, economic and educational institutions. The regeneration of the Earth and the regeneration of humanity, as sides of the same coin, must be tackled simultaneously, in space and time, for their mutual support. In the ecosystem approach, goals and new pathways to achieve them consider a set of values, norms and policies that prioritize socio-ecological objectives, human well-being, the quality of natural and built environments, the aesthetic, ethical and cultural meaning of existence,

encompassing all dimensions of being in the world (intimate, interactive, social and biophysical), as they interact to elicit, sustain or transform the events.

Hi Kaisi Daniel and all,

Anyone that works with kids in schools can go to the World's Largest Lesson for lesson plans and suggestions on ESD at all grade levels. Also our governments and UNESCO have developed an excellent Framework and a Roadmap for implementing ESD. I have taught about the UN and SDGs with primary grade students. Just have to bring it down to terms they understand. IE the SG is like the principal of their school but in charge of working with 192/3 governments.

Greetings from Housing and Land Rights Network of Habitat International Coalition. We should take note that, although we have two political resolutions of the UN recognizing the right to environment, they do not declare the normative content of the right, state obligations or what constitutes a violation. That will be the subject of the coming General Comment of the Committee on the Rights of the Child as of November 2022. We have the opportunity then to submit inputs to that process for the next 6 months thereafter. We are encouraging the UN COmmittee on ESC Rights to do the same under the Covenant (ICESCR) after the CRC General Comment.

10:07:51 From Joseph Schechla To All Panelists:

To Nathan Thanki: We are interested to see any draft language proposed for the FFNPT, but that is hard to find. We are also concerned that such a treaty takes us back to the old Stockholm 1972 controversy over such proposals seeking to block developing countries from exploiting their

sovereign resources to advance their development previously arrested by the domination/colonization of Western countries.. Any reply to these would be much appreciated

I am sure you are aware of October 23 as the 50th Anniversary of the National Marine Sanctuaries Act

What do you plan to do?

10:20:57 From IRENE CARI To Everyone:

Buenos dias,soy Irene Cari de una Asoc. civil de mujeres feminista y soy indigena. Con respecto a los temas que hoy estoy participando es una lucha permanente en nuestros territorios por las inmobiliarias extranjeras,de politicas extractivistas que no respetan nuestros montes y espacios de bozques de donde vivimos los pueblos indigenas. Hay juicios ganado en la Corte interamericana con respecto al respeto al medio ambiente ancestral y devolucion de los montes y rios para la sipervivencia de ciertos animales y preservacion de la vida de las mujeres y niñas que viven de la tierra La Pacha.

10:21:23 From Osver Carrasco To Everyone:

10:25:45 From IRENE CARI To Everyone:

Dejo mi cel, por si hay otros grupos de otros lugares de Ame Latina para intercambiar las luchas de justicia ambiental y las luchas territoriales undigenas. El ecocidio, el terricidio es asi como lo definimos los movimientos de mujeres indigenas y feinistas por cuanto afecta de manera directa la vida y salud de las mujeres ya sea en territorios de bozques como de ciudades urbanas. Las contaminaciones mineras son espantosas como van eliminando aguas dulces de las montañas

En nuestro de Argentina, Jujuy y Salta son zonas valiosas atmosferas de agua y animales unicos en el mundo y estas practicas politicas de genocidios van directo a la contaminacion de aguas o privacion de llegarnos a los rios por los cercos de alambres de puas o sea apropiacion violento de tierras y montes, rios donde y de lo cual vivimos las personas, pues la pezca y los algarrobos segun regiones altiplano puneño o bozques de Santa Barbara son dejamos a manos de estas politicas de rapiñas genocidas por eso lo definimos TERRICIDIOS..

La lucha AMBIENTAL , sino discutimos este tema que esta condicionado por las politicas de cada pais, seria ingenua. pues solo somos ONGs concientes de lo que estas invaciones genocidas genera muerte de las personas sino tambien de animales unicos en el mundo,

Espero que este Seminario sirva para incidir y fortalecer nuestras luchas territoriales de las mujeres rurales, urbanasm campesinas e indigenas. Nuestras lenguas no tienen protagonismos en las consultas de diseños de mapas territoriales. Hoy estan acorralandonos para que no avancemos con nuestras marchas por el AGUA, PARA PARAR LOS DESMONTES Y POR NUESTRAS LENGUAS que existan en los diseños de politicas publicas.

10:56:52 From Osver Carrasco To Everyone:

IRENE creo que debemos ahora desde los territorios afectados por el cambio climático y la lucha extractiva ir mas allá, en mostrar y denunciar en los espacios internacionales las malas practicas de las políticas de los gobiernos, que usan esos espacios para decir que todo anda bien pero que no es así y que es la fachada verde de las corporaciones y que lamentablemente las organización seguimos apostando esos espacios
